Average outpatient sending rate per visit on private inpatient services (RMB)	196	298	-34.2%
Total average outpatient spending per visit (RMB)	275	437	-37.1%

Notes:

- The above average inpatient sending rate per bed-day is determined based on the Company's bills for services provided to inpatients, which are different from the medical insurance reimbursement rates and the Company's reimbursement for some medical services. It may not be accurate.
- The significant increase in outpatient visits and significant decrease in revenue compared to the same period last year are primarily due to: i) a decline of lower-rate online health services through the Company's internet hospitals; and ii) optimization of service of dialysis in private inpatient hospitals.

The above revenue and indicators are based on the Company's records and are not necessarily audited by the Company's auditors. The revenue and indicators may be different from those disclosed in the annual and semi-annual reports. The revenue and indicators disclosed in the annual and semi-annual reports will be audited by the auditor.

Shareholders and potential investors of the Company are reminded to rationally deal with any information not officially released by the Company, and shareholders and potential investors of the Company should exercise caution when dealing in the shares of the Company.
